MERN Stack Developer

Detail-oriented MERN Stack Developer with strong expertise in frontend development, backend API integration, and database management. Adept at building scalable applications, deploying projects to live servers, and maintaining high code quality standards.

Experience

Nizcare, Trichy — Web Development

June 2024 - PRESENT

- Built and supported **end-to-end web applications**, delivering scalable frontend and backend solutions.
- Led the **redesign of corporate websites and internal dashboards**, enhancing user experience and operational efficiency.
- Designed and implemented **responsive, brand-consistent email templates** optimized for various screen sizes and email clients.

Projects

TaskGo - Detail ([Link](#))

- Developed **TaskGo**, a multi-tenant SaaS task management platform with secure role-based access (Super Admin, Company Admin, Users) and isolated data handling using unique tenant IDs.
- Implemented features like task assignment, deadlines, priority levels, daily reporting, and real-time dashboards to enable seamless project tracking and team collaboration across multiple organizations.

Origin Organic (E-com) - Detail ([Link](#))

- Developed the **Origin Organic e-commerce platform**, including responsive frontend, backend logic, and seamless user experience.
- Built a fully functional **admin dashboard** with capabilities to add, edit, delete products and manage order status updates.

Corporate Websites - Detail ([Link](#))

- Developed the **Nizcare corporate website** with a responsive, brand-consistent UI and optimized performance.
- Built a secure **admin panel** to manage website content and data, implementing both frontend and backend functionalities.
